Description

The Lady Sitness office swivel chair has been specifically developed with consideration for the anatomical characteristics of women. The backrest of the office chair, particularly its lower part, has a special shape, as women's spines require more support at this point. The seat surface has 7 different zones with varying tension and firmness to ensure maximum seating comfort. The Body-Balance-Tec® mechanism allows for unique, three-dimensional movement while sitting, which strengthens the back muscles. The Lady Sitness swivel chair is delivered with a black star base and castors suitable for carpeted floors. The price includes height-adjustable armrests.
